[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Computer Science graduate specialising in multi-agent LLM systems and production-ready GenAI applications. Skilled in designing and deploying intelligent systems across the full stack Python, FastAPI, Next.js, and Supabase with hands-on experience in LangGraph, RAG pipelines, prompt engineering, and LLM API integration. Focused on building reliable, scalable AI solutions for real-world problems.

Skills

Languages: Python, JavaScript, C, SQL

Frontend: React, Next.js

Backend: FastAPI, Flask, RESTful APIs

Databases: PostgreSQL, Supabase, MySQL

AI/Gen AI: LLM APIs, LoRA Training, Fine Tuning, ComfyUI, Diffusion Models (FLUX, WanVideo, Qwen), Prompt Engineering, RAG, Tool Calling, LangChain, LangGraph, RAGAS(Framework)

Data/ML: Pandas, NumPy, scikit-learn, Tensor Flow

Tools: Git, Github, Docker, Jupyter Notebook, Claude code

Visualization: Power BI, Matplotlib

Projects

CareCircle-Multi Agent Eldercare Coordination Platform | Next.js, FastAPI, Celery [Link](#)

- Eldercare coordination across India is fragmented with no single source of truth for families managing ageing parents remotely, so built a multi-agent AI platform using FastAPI and Celery that orchestrates medication tracking, health monitoring, and caregiver alerts in one system with a Gemini 2.5 drug interaction pipeline validated by a practising doctor to ensure clinical accuracy.

JobFeed - AI-Powered Daily Job Digest | FastAPI , React/TS , Supabase , Groq , Resend [Link](#)

- Job seekers wasted hours scanning platforms with no personalized filtering, so built a FastAPI + React/TS system scoring listings via LLaMA 3.3 70B with smart caching layer collapses eliminates all repeated API calls, cutting costs significantly. Scheduler guarantees on-time delivery.

AI-Powered Document Verification Platform | FastAPI , React/Vite, Supabase, Groq, Paddle OCR, OpenCV [Link](#)

- Manual Indian government ID verification was slow and error-prone, so designed a fraud-detecting platform supporting 11+ document types in 8+ languages using PaddleOCR, OpenCV, and Groq LLM. Achieved 72% accuracy on APPROVED/REVIEW/REJECTED classification across 10 test documents.

AI Digital Twin | ComfyUI, WanVideo, FLUX LoRA, Chatterbox, Wav2Vec2, InfiniteTalk [Link](#)

- Photorealistic talking-head avatars required expensive studios, so built an open-source pipeline. FLUX LoRA trained on 20 reference images, stable likeness at LoRA strength at 0.80-0.90, cloning voice via Chatterbox, and generating lip-synced video at 640×640 25FPS using WanVideo 2.1 inside ComfyUI.

AI Product Photography | FLUX.1 Dev , LoRA Training , ComfyUI , Synthetic Data [Link](#)

- Real product photography was too costly for small businesses, so trained a FLUX.1 Dev custom LoRA on 17 synthetic images, at 2500 steps and with advanced prompt engineering, delivers studio-quality consistent outputs.

Experience

Python Backend Developer - iCompaas

Jan 2025 - Jan 2026

- Built and maintained RESTful APIs using Flask for cloud-based backend services, handled 15 endpoints supporting 4 client integrations.
- Automated functional and regression testing using Selenium WebDriver, reduced manual test execution time across 2 browsers.

Education

Bachelor of Technology - Computer Science & Engineering (Data Science)

2021 - 2025

Vignana Bharathi Institute of Technology, Hyderabad

CGPA: 8.03

Certification

Applied Generative AI Cohort 6 - 100xEngineers

Mentor: Siddhant Goswami
